-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Priority

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:
2. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Information Disclosure Statement

3. A portion of the information disclosure statement filed 4/15/01 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because part of the IDS statement has been incorrectly filed. The applicant has sent in a copy of the list of references that was cited by the examiner, this is improper filing of the IDS, there is no place for the examiner to initial or sign, to indicate that the reference has been considered. The remaining references have been considered, as shown by the examiner. But the Examiner list of references cited in the parent case, has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with

the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 101

Claim 1 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis for this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the “progress of science and the useful arts” (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use or advance the technological arts.

In the present case, claim 1 only recites an abstract idea. The recited steps of merely obtaining a passenger identifier, obtaining baggage, obtaining destination address, and delivering baggage to the destination, does not apply, involve, use or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pen and paper. These steps only constitute an idea of how to ship passenger baggage.

Additionally, for a claimed invention to be statutory, the claimed must produce a useful, concrete, and tangible result. In the present case, the claimed invention produces a method for transporting passenger baggage (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claim 1 is deemed to be directed to non-statutory subject matter.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Golf Bag Shipping (GBS)(www.golfbagshipping.com).

6. GBS discloses the use of a method of handling passenger baggage, such as golf clubs, for a traveler (See Home Page), the method comprises:

- a. Obtaining a passenger identifier for a passenger (See Home page, zip code, and How The Process Works, Item 1),
- b. Obtaining passenger baggage (See How The Process Works, Item 3),
- c. Obtaining a destination address for delivery (See How The Process Works, Item 1).
- d. Delivering passenger baggage to destination address (See How the Process Works, Item 3).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Quackenbush et al. (6,512,964) and Manabe et al. (6,594,547) discloses the use of baggage transport systems and Bravman et al. (5,866,888) discloses the use of a traveler and luggage security system.
